Company: Migros One

Mail: umuttvural@gmail.com

## Summary

I graduated from 9 Eylul University in the field of economics in 2022. I got an offer from the company I started as an intern in the last year of my school and I had the opportunity to experience the professional business life. I am currently learning HTML, CSS, Bootstrap, JavaScript, React and other technologies full time. In short, I can write **mobile-friendly**, **responsive**, **visually strong websites**. I have also coded projects that improve my JavaScript and React skills such as **Music player**, **Gym App**, **Car game**, **API Search, Weather App** etc. and I still continue to develop them. My vision is to constantly improve myself in these technologies, which I have been passionately attached to since the first day, to make a difference with the works I have created and to be a sought-after software developer in the industry.

**Check my personal website to view my projects!**
